Lift Pro II Series

The WSP™ Lift Pro II is a compact, above ground, self priming sewage lift station that is a “complete from the factory” unit — fully customized to meet your requirements. The aesthetically pleasing exterior is an extremely durable and corrosion resistant fiberglass enclosure that complements its surroundings and protects from the elements.

Designed with four hinged doors, allowing for ease of access to the pumps and controls for maintenance and service. The core components inside the enclosure are built with our “connect and go technology”, which makes connectivity to the lift station a breeze.

The WSP™ Lift Pro II harbors two rugged and dependable WSP™ self-priming solids handling trash pumps which are suitable for a wide range of applications and services. All WSP™ self-primer pumps are engineered with motors sized to meet your specifications.

Features & Benefits

- UL listed package
- Molded fiberglass enclosure
- Reinforced welded steel base
- Horizontal self-priming pumps
- Automatic air release system
- Power and control panel
- Liquid level control system
- Ductile iron fittings with valves
- Ventilation blower and heater
- Epoxy coated
- Internal conduit and wiring
